
GROUP PROJECT QUESTIONNAIRE

NAME: Jason Rasmussen

GROUP: HBLL1

(Note, this questionnaire is confidential)

1. YOUR PERSONAL VIEW ON THE GROUP:

- Did your group work well together? Why/why not?

I believe our group worked well together because we all have different strengths and were able to build off and help each other.

- Was the work allocated fairly?

I believe the work was allocated fairly and we all contributed equally to the success of the project.

- Was any work wasted? Why?

I believe that in general we did very well at not wasting any work. One might argue that we “wasted” some work at the beginning of the semester in the sense that we worked on some things that we didn’t actually use in the last stages of the report. This happened because the nature of our project changed throughout the semester as we learned more about what we could practically do.

- Did everyone in the group make an even effort or were there outstanding exceptions?

Everyone in the group made an even effort. We all contributed equally in different ways on the project.

2. YOUR PERSONAL VIEW ON YOURSELF:

- What was the most interesting you learned from doing this project?

I thought it was interesting how many assumptions I made as I completed the project. It was hard not to induce bias into the experiment, but I found myself having to simplify the project in some aspects. For example, the library had many fields and information that it kept track of and we were forced to only analyze a selection of this data. Determining what was important definitely induced bias into the results. I found it interesting *how* many assumptions I had to make.

- Did you contribute your full share to the project? More? Less? Why?

I contributed my full share to the project. I worked with my sister on many different parts of the project and feel that I contributed my fair share.

- Approximately how many hours did you spend on the project?

I spent approximately 25-30 hours on the project.

3. IF YOU HAD TO AWARD GRADES (BETWEEN 0 AND 100) TO YOUR COLLEAGUES AND YOURSELF ON THE PROJECT, WHAT WOULD THEY BE?
(name each colleague and put a grade next to their name)

- Myself: 100

- Jason Dobry: 100

- Erin Rasmussen: 100

- Curtis Thacker: 100

4. ANY OTHER COMMENTS:
